Hedehusene, September 02, 2014.

**ROCKFON hereby declares that the products**

**"Soundstop dB21" and "Soundstop dB30"**

**are designed to be applied on top of partition walls, closing the gap between the partition wall and the deck above, thus acting as a sound barrier between the plenums of two adjacent rooms.**

**The products cannot be considered suspended ceiling panels as defined in the scope of the harmonised standard EN13964, and there is thus no European requirement for CE-marking of said products.**

**In the framework of the BREAM-NOR scheme, section HEA 9, we do NOT consider these products eligible for declarations in the section for suspended ceiling products (in Norwegian: Himlings-plater)**
