## MAINTENANCE

Tarkett wooden floors have a Protoco surface treatment and therefore a strong protection against normal wear, abrasion, scratches and stains. Some floors will require more frequent maintenance for increased life span. Generally these products are light coloured floors and hardwax oiled floors, particularly with brushed surface and/or highlighted details, such as saw marks. Please always refer to maintenance guidance available on websites.

Vintage Protoco Hardwax Oil

# VINTAGE

## DESIGN

Oak planks that witness the passage of time. Each board is crafted with details like saw marks and dents so it appears worn from day one, yet remains highly resistant over time. Vintage Planks are designed with a mini bevel along the length and many are also suitable for public areas thanks to a special camouflage effect and a hardwax oil finish.

Tarkett's international range of floors comprises many different products. Some of these may not be for sale in your country. Although every care has been taken to reproduce images that reflect the finished product, the quality of monitor and printer and the nature of wood results in variations in the color and structure of individual planks.
