MULIGHETER
TIL Å BLI INSPIRERT

Fliskatalogen

BERGERSEN FLIS

FLISKATALOGEN

BERGERSEN FLIS

Først og fremst for proffene

Bergersen Flis ble startet opp som en familiebedrift i 1996. Familien hadde allerede mange års erfaring fra flisbransjen. Før vi åpnet det 850 m² store fliscenteret på Ryen i Oslo, tok vi fire viktige valg:

- Vi skal levere kvalitet
- Vi skal kunne flisfaget
- Vi skal ha høy servicegrad
- Vår utstilling skal inspirere

Det er forskjell på fliser!

Det finnes fliser som blir matte etter en runde med skurekluten, og fliser som beholder glansen år etter år. Noen fliser kan du bruke på kjøkkenbenken, andre blir det riper i. Noen kan brukes ute, andre sprekker. Noen kan brukes i basseng, andre lekker. Noen er trendy, andre er definitivt det motsatte. Fordi vi fra første dag bestemte oss for bare å tilby kvalitetsfliser, har vi alltid brukt tid og ressurser på å finne frem til riktige produsenter. Vi importerer i dag fra meget anerkjente fabrikk i Italia, Spania, Portugal, Frankrike, Nederland og Tyrkia. Alle våre fliser produseres etter den strenge industri- og produksjonsnormen EN 14411.

Fliser er fag!

Bergersen Flis har kanskje landets mest krevende kunder – dyktige håndverkere, arkitekter, utbyggere og entreprenører – som forventer at vi kan flisfaget. For deg betyr det at du får gode råd og riktige produkter. Kanskje trenger du råd om stil og trend, kanskje har du rent fagmessige spørsmål: Fortell oss hvor du skal ha flisene – da kan du være trygg på at du får riktige råd hos Bergersen Flis.

Proffservice

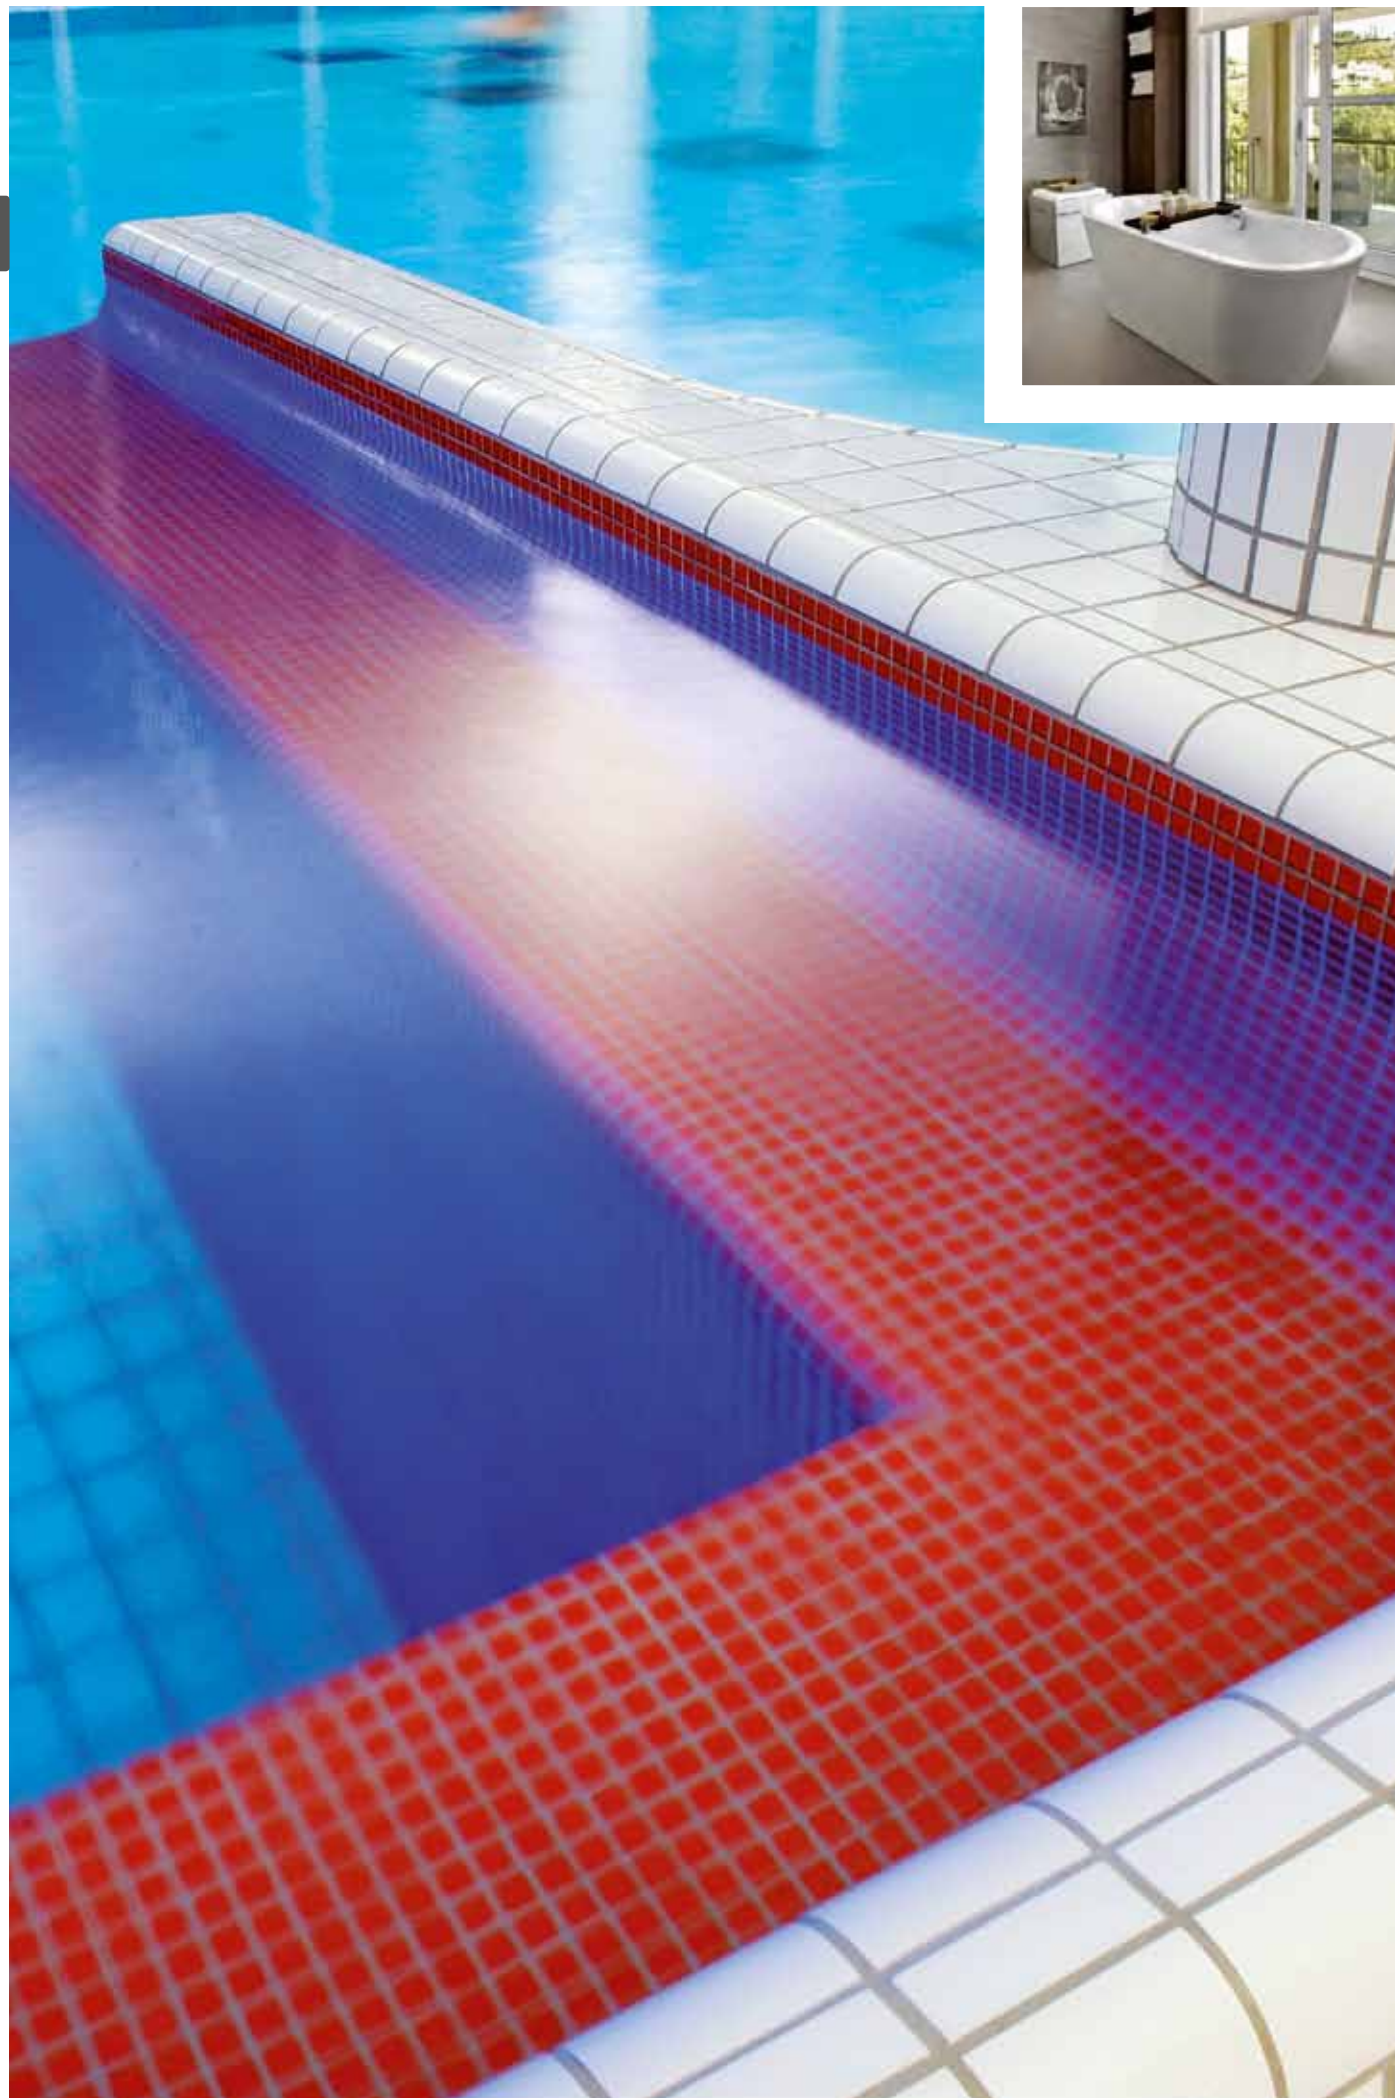

Pølser på torsdager og 200 000 m² med fliser
Fra første dag bestemte vi oss for at service ikke skulle være en klisje, men et ord med innhold. Derfor bruker vi lang tid på å finne frem til riktige medarbeidere. Derfor serverer vi pølser til gamle og nye kunder hver torsdag, og derfor har vi flisene på lager! På hovedlageret på Kolbotn har vi tusenvis av paller med flis. Med andre ord: Ingen ventetid. Flisleggingen kan begynne kort tid etter at du har valgt fliser.

Bli inspirert

Våre utstillinger viser de siste trender innen baderom og interiør. Her legger vi stor vekt på å presentere vårt store sortiment på en så virkelighetsnær og inspirerende måte som mulig. I flere av butikkene finner du også flotte arkitekturrom hvor du kan boltre deg med designerfliser i alle størrelser og farger.

Innhold

Innledning	1 - 11	■
Serier	12 - 117	■
Veggfliser	118 - 139	■
Dekorer	140 - 155	■
Gulvfliser	156 - 195	■
Kjøkken- og Mosaikkfliser	196 - 241	■
Leverandører	242 - 246	■

Flis please!

Stadig flere velger fliser, stadig flere steder. For fliser har mange fordeler.

For det første blir det fint. For det andre er de slitesterke og varer lenge. Og for det tredje, fjerde, femte og sjette:

- Keramiske fliser trenger ikke behandling (bortsett fra noen våtpressede)
- Keramiske fliser er enkle å holde rene
- Keramiske fliser egner seg godt for allergikere, fordi de ikke produserer eller holder på støv og andre partikler
- Keramiske fliser magasinerer varme, og er derfor veldig godt egnet til gulv med varmekabler

Kort fliskurs

- Veggfliser kan ikke legges på gulv, men gulvfliser kan brukes begge steder
- Til baderomsgulv bør du ikke bruke større enn 20 x 20 cm. Dette for å oppnå tilfredsstillende helling til sluk. Ønsker du større formater, kan dette løses med mosaikk eller nedsenket dusjhjørne
- Ute må du bare bruke frostsikre fliser, som trekker mindre enn 0,5% vann. Slike fliser kalles ofte for porcelenato. Limet må også være frostsikkert
- Det er viktig å bruke riktig lim mot riktig underlag – ikke alle underlag egner seg for flislegging. Spør om råd!

Symbolforklaring

Veggfliser

Fliser med vannopptak over 10%. Egner seg til alle husets vegger.

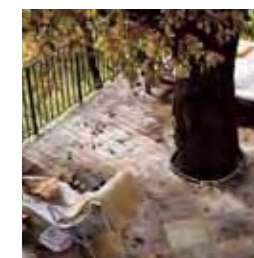

Gulvfliser

Fliser med vannopptak på 0,5-6%. Noen passer på baderom, andre passer bedre i en gang eller et annet rom i hjemmet. Gulvfliser kan også brukes på vegg.

Frostsikre fliser

Fliser med vannopptak på under 0,5%. Disse flisene egner seg godt både inne og ute.

Blanke fliser

Fliser med en blank / halvblank glasur eller polerte fliser.

Rektifiserte fliser

Fliser med rettskårede kanter.

Naturstein

Må behandles. Begrenset bruksområde.

Glass

Begrenset bruksområde. Krever spesiell behandling.

Fliser på nett

Fliser som ligger på papir, plastikk eller fibernett.

Bestillingsvare

Dette er fliser som vi ikke har på lager. Spør oss om leveringstid.

- Noen frostsikre fliser kan være glatte utendørs
- Fliser er et bearbejdet naturmateriale og det kan forekomme avvik i størrelse og farge
- Husk at farge gjengivelse kan avvike fra katalog til ferdig produkt
- Vi tar forbehold om endring i sortimentet
- Vi tar forbehold om leveringstid
- Vi tar forbehold om skrivefeil

Produksjon

Keramiske fliser er hovedsakelig laget av leire i kombinasjon med andre produkter som for eksempel kvartssand, feltspat og kalkspat.

Det finnes to typer produksjon av fliser, tørrpressing og våtpressing. Tørrpressing er en mer moderne og den mest utbredte produksjonsmetoden. Våtpressede fliser omtales ofte som klinker eller terracottafliser.

En miks av leire blandes og presses til ønsket format. En eventuell glasur legges på og flisene brennes på ca 12-1300 grader for å forsikre kvalitetsprodukter med lang levetid

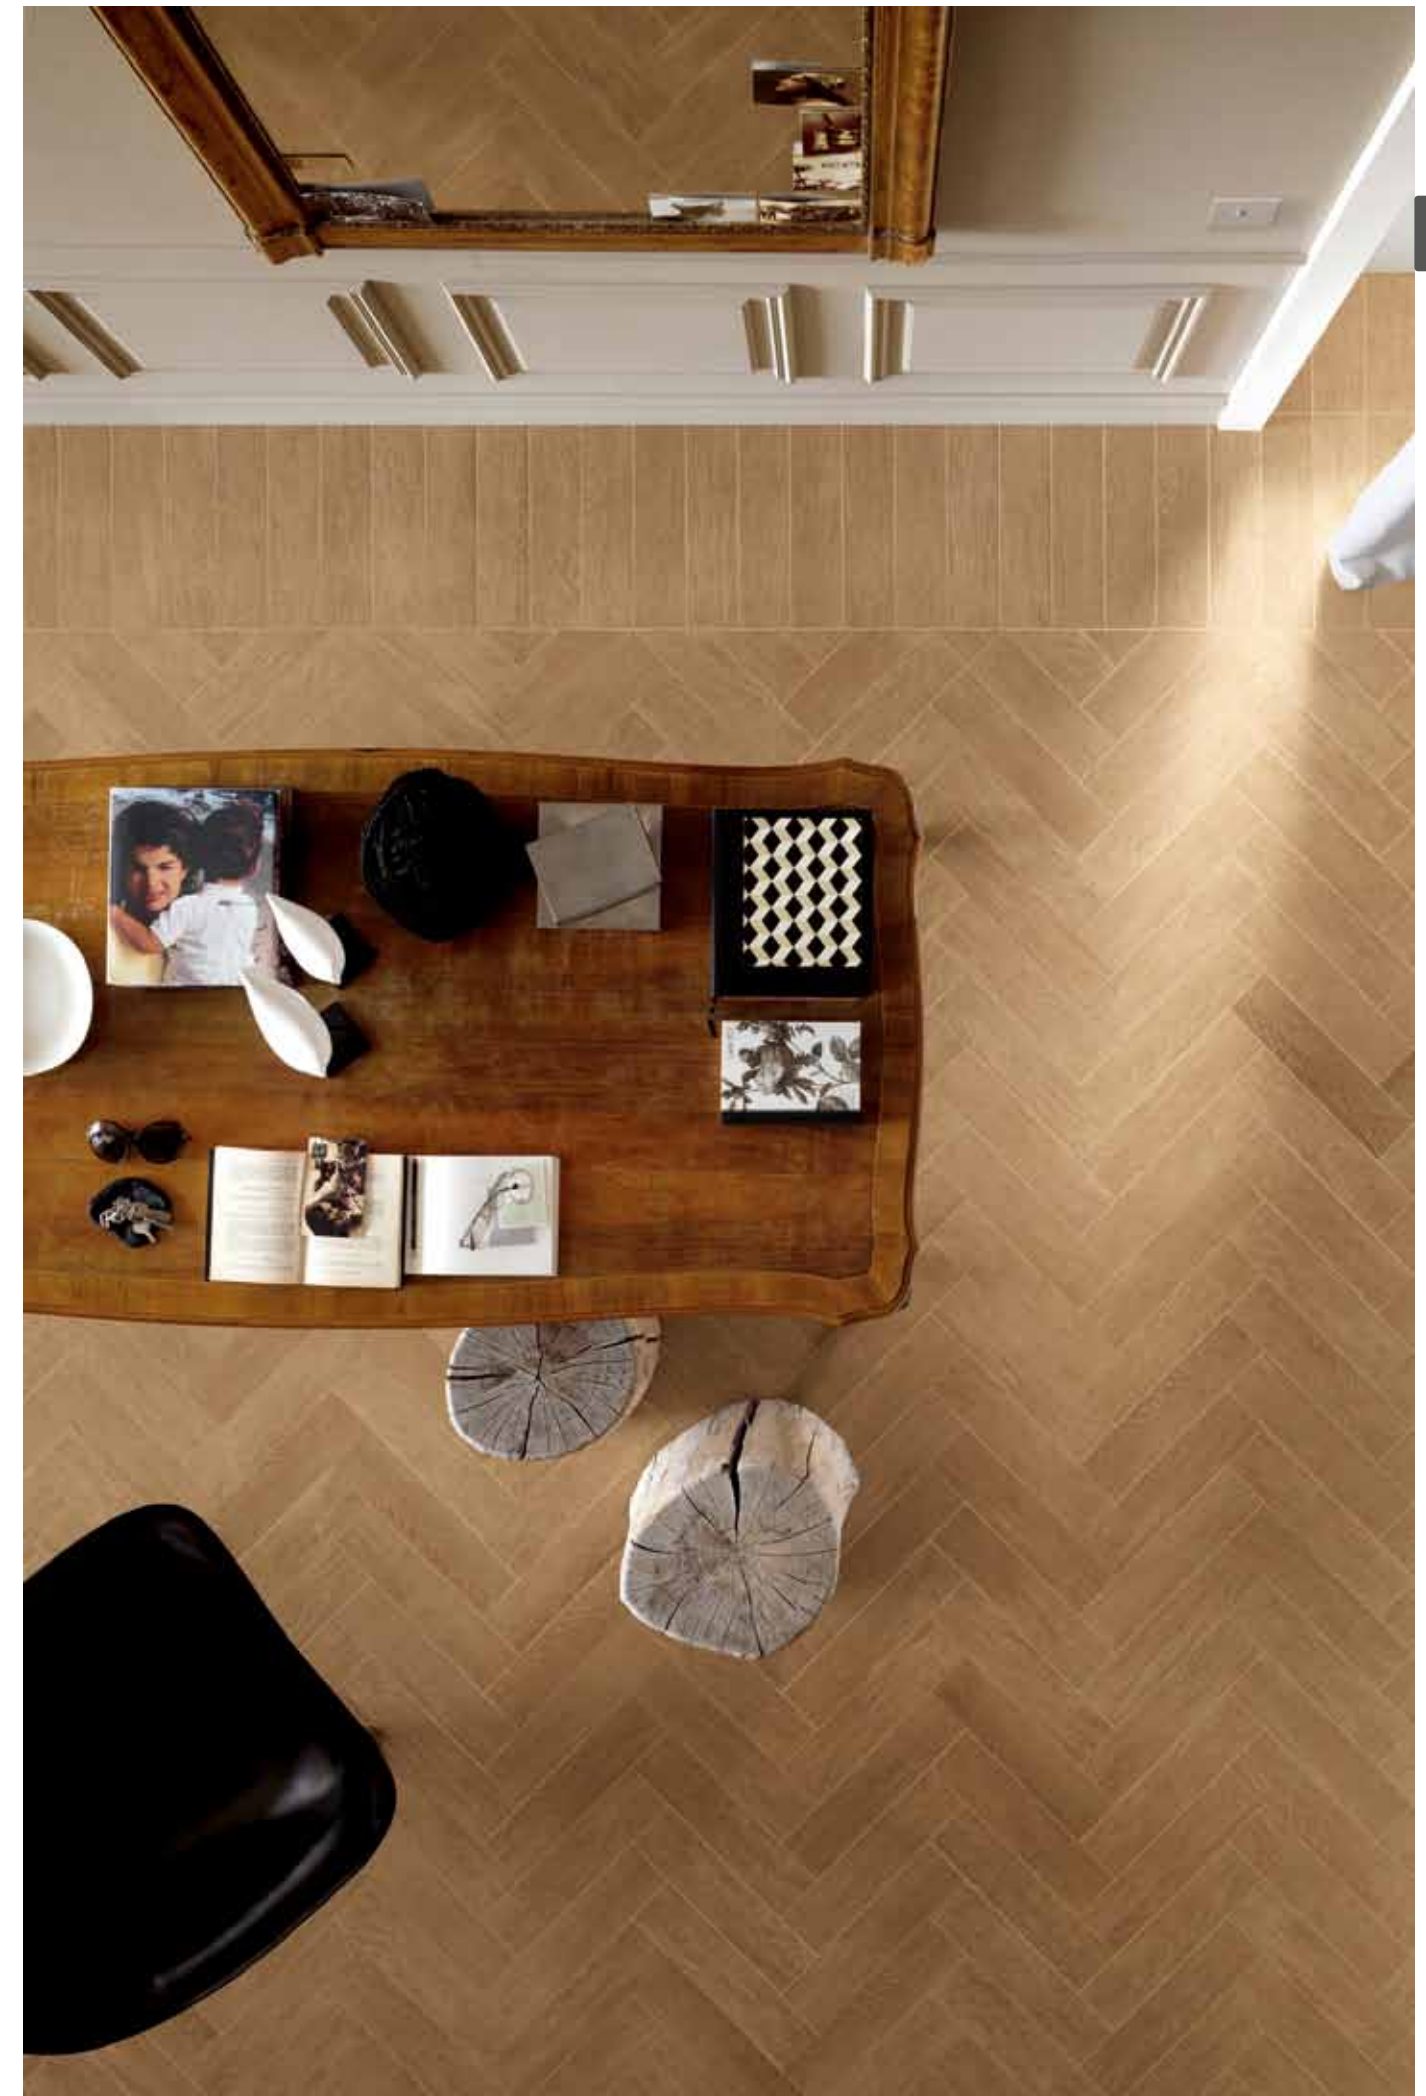

Brennkammer flisproduksjon

Polerings/kalibreringslinje

Silostasjon for blanding av leiremasse og farger

Prosjekt levert av Bergesen Flis, Radisson SAS Trysil

Serier

Serier

Ønsker du å skape et helhetlig stil? En "rød tråd" i alle husets rom? Da kan serier gjøre oppgaven enklere for deg. Enkelte fabrikker lager nå komplette serier, med fliser i absolutt alle tenkelige farger og størrelser – og til både badetrom og andre rom. Mange velger en serie i en fargeskala som de liker, for så å differensiere med ulike formater i forskjellige rom.

Viktig å tenke på når det gjelder serier

- Snakk med din håndverker om hvilke størrelser som egner seg i de forskjellige rommene.
- De store formatene gir følelsen av større rom, fordi det blir færre fuger.

Trender

De duse fargene dominerer. Typisk går disse ton-i-ton. En annen trend, som også er svært funksjonell, er gulvserier med stor variasjon i størrelser. Det er f.eks. klokt å kombinere den aller minste mosaikk med fliser i store formater som 30 x 90 cm, fordi det dermed blir mulig med store gulvfliser samtidig som man oppfyller strenge krav til helling mot sluk.

Veggfliser

Vegg

Badet er viktig. Det skal både være funksjonelt og vakkert. Det koster mye å pusse opp badet, og det er viktig å velge riktig, for det er sikkert lenge til neste gang det blir nytt bad. Det er viktig for oss at du skal finne løsninger og bli inspirert.

Viktig å tenke på

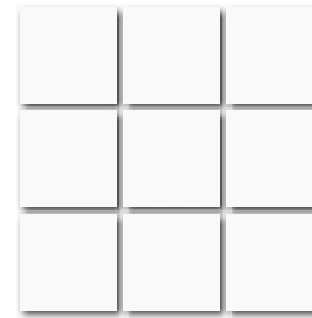

- Velg noe du vil trives med lenge – noe tidløst
- Stramt budsjett? Velg rimelige fliser på vegg. Bruk heller eksklusive fliser på gulvet da arealet er mindre

Trender

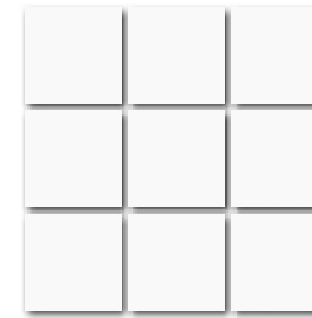

Mosaikk, rektangulære fliser og store formater er i tiden. Dette skaper mange variasjonsmuligheter, og fantasien er eneste begrensning. Uansett blir totalinntrykket tidløst og klassisk. Mange velger bad i nøytrale farger, men leker seg likevel med dekor og farger. Beige, brunt, hvitt, grått og sort er gode farger som du kan leve lenge med. De litt mer vågale drister seg til sterke farger som oransje, rødt og grønt. Farger som lilla, rødt og grønt brukes gjerne på fondvegger eller som striper langs en vegg eller to.

Dekorere

Dekorere

Pyntelister og dekorere brukes til å sette personlig preg på rommet. På badet plasseres de ofte vertikalt på strategiske steder for å skape liv og glamour.

Viktig å tenke på:

- Horisontale linjer får rommet til å virke større.
- Vertikale linjer får taket til å virke høyere
- Velg dekorere og lister som passer til stilen i resten av rommet

Trender:

- Glass og marmor brukes mye både som pyntelister og dekor
- Dusjen blir ofte dekorert med andre farger eller materialer for å skape kontraster eller for å fremheve Spa-følelsen
- Det brukes mye blomster og barokkmønster

Gulvfliser

Gulv

Tepper og treverk taper stadig terreng til flisene. Flisene er lette å rengjøre. De er utrolig slitesterke, og dessuten blir det vakker med fliser, både inne og ute.

Viktig å tenke på

- Det aller viktigste er at kvaliteten er god nok til ditt bad
- Dersom flisene skal ligge ute, må de være frostsikre
- Fliser som skal ligge i gangen eller andre steder med stor trafikk, og spesielt på steder hvor folk har sko på seg, bør ha en sterk glasur eller være uglasert
- Fliser med farger og litt struktur skjuler støv og skitt, og motsatt synes alt på helt lyse og helt mørke fliser
- På en terrasse kan helt svarte fliser bli litt for varme for nakne sommerføtter

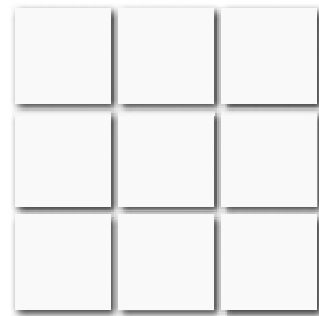

Trender

Både store fliser og kombinasjoner av ulike størrelser er veldig tidsriktig. En annen trend er de store formatene. De aller modigste drister seg til 60x120 cm og 90x90cm.

Nordmenn velger oftest gulvfliser i naturlige farger som sort, grått, beige og brunt, men polerte og halvpolerte overflater er også i ferd med å få fotfeste.

Kjøkken- og Mosaikkfliser

Mosaikk

Mosaikk går aldri av moten, og vi kan trygt si at mosaikk og kreativitet hører sammen. Mosaikk egner seg til det meste: til kjøkken, til badetrom og som dekorasjon. Hvorfor ikke kle inn badekaret i mosaikk. Eller hva med å bruke mosaikk på soverommet – til en tøff sengegavl. Mosaikk er en fin måte å skape liv i et rom på uten å gjøre så drastiske inngrep.

Hva bør du tenke på?

- Underlaget må være slett for at resultatet skal bli optimalt
- Den siste tiden har det vært brukt mye glass, husk at dette egner seg best på vegg
- Riktig farge på lim og fugemasse må til for å oppnå ønsket resultat

Mosaikktrendene

Mosaikk brukes som lister og dekor. Materialer i glass, marmor og keramikk er populære. Mosaikk kommer i alle størrelser, og vi ser nå at mosaikk brukes både på gulv og vegg – og kanskje særlig i dusjniser. Med hensyn til farger, så ser vi to retninger; den ene er å la mosaikken gå i samme toner som flisene. Den andre er å bruke mosaikk som et fargerikt innspill.

Våre leverandører

For å sikre at vi hele tiden har de siste, beste og mest tidsriktige produktene, jobber vi med leverandører fra hele Europa.

Portugal, Spania, Italia og Tyrkia er de landene vi kjøper mest keramiske fliser fra. Disse landene er foregangs land både når det gjelder kvalitet og trender.

ARDEX

kvalitet, sikkerhet og tid

Innholdet i våre sekker er mer enn bare grått pulver. Med et Ardex-produkt følger en totalløsning, som inneholder alt du får bruk for før, under og etter dine oppgaver.

Ardex-pakken

Kvalitet fra grunnen

Råstoffene er nøye utvalgt ut fra et kvalitetskriterium, og laboratoriekontrolleres før de inngår i produksjonen.

De ferdige produktene skal gjennom samme kontroll, før de sendes på markedet. Det sikrer høy kvalitet og ingen reklamasjoner.

Produktutvikling

Det er lett å etterligne produkter. Nye ideer krever derimot knowhow. Men nye ideer kommer ikke ut av ingenting. Vi lytter til våre kunder og lar tanke komme til handling.

Derfor har vi et produktprogram, som setter byggeplassens utfordringer i system.

Tid

Produktene er hurtigherdende og hurtigtørkende. Vi kan tilby en systemløsning som gjør det mulig å renovere/bygge et nytt badetrom - fra påstøp til ferdig fugede fliser - med en samlet tørketid på kun 9 timer.

Det gir store tidsgevinster, bedre totaløkonomi og mer fleksibel planlegging.

Oppgaveløsning på alle nivåer

Vi kommer når du ønsker å bruke oss, med svar på dine spørsmål og løsninger på enhver oppgave. Teoretisk, men fremfor alt praktisk. ARDEX' teknikere informerer deg og demonstrerer direkte på plassen den optimale løsning til din oppgave. Man sparer tid på problemløsninger som alle drar fordeler av.

Rådgivning til minste detalj

Våtromsregler, trykkstyrke, produktvalg, damp tetthet, herdetid, vanntilsetning, viskositet... Dagens byggebransje reiser mange spørsmål. ARDEX gir deg et faglig klart svar.

Ring og spør – eller delta på gratis Ardex-kurs. Vi underviser i alle fasene av byggebransjen.

I allianse med våre grossister

Ardex' produkter leveres 100 % via bransjens grossister. Ingen sidesprang, ingen unntakelser. Gjennom dialog, samarbeid og felles markedsføring arbeider vi for våre felles interesser. Å forsyne byggebransjen med kvalitetsprodukter - og gjøre det til en god forretning.

Om ARDEX

ARDEX er i dag et velkjent varemerke verden over. En av verdens mest fremgangsrike produsenter av hurtige sparkel-, lim- og fugemasser. Alltid av høyeste kvalitet.

I ARDEX-konsernet har vi mer enn 50 års erfaring med sparkelmasser og flislim. Vi nøyer oss ikke bare med å tilpasse oss nye krav, men satser også intensivt på forskning og utvikling, for å tilby deg produkter, som både letter ditt arbeid og gir deg tidsgevinster.

Vårt sterke ARDEX-sortiment er et av bevisene på det. Hvert ARDEX-produkt bygger på unike egenskaper. De er lettere å arbeide med, presterer mer og gir lavere totalkostnader. Samtidig inngår produktene i et komplett system, som til sammen gir et sluttresultat utover det vanlige.

I over 35 år har vi forsynt norske håndverkere med ARDEX-produkter. Vi er i dag 10 ansatte i Ardex Norge, som arbeider med salg, markedsføring og teknisk support. Målgruppen er den profesjonelle håndverker innenfor gulv-, flis-, mur- og malebransjen.

Våre produkter lagerføres av utvalgte forhandlere, som står inne for leveringsdyktighet landet over. Vi i ARDEX konsentrerer oss mest om teknikk, support og utdanning av bransjen via en omfattende kursvirksomhet ved vårt kurssenter på Furuset i Oslo. Vi har 6 tekniske rådgivere, som alltid befinner seg midt i begivenhetene, og som hurtig yter både teknisk og praktisk hjelp til entreprenører og forhandlere.
