

Supplier Declaration of SVHC in Articles Produced for the NOBIA Group

As part of our company's REACH (Registration, Evaluation, Authorisation and Restriction of Chemicals) compliance strategy, we are contacting our suppliers to ensure that they are aware of the SVHC (Substances of Very High Concern) obligations and to ask if any of the products (and its associated packaging) that you supply us with could be affected. The following link can be used if needed to obtain further guidance on this aspect of the regulations from ECHA (European Chemicals Agency), [ECHA](#)

Under REACH there are currently two lists of SVHCs that trigger obligations. The first are those listed as restricted substances (in Annex XVII) which is a compilation of all substances previously restricted under the Marketing & Use Directive and which continue to be restricted under REACH regulations.

Please follow link here for further detail, [REACH Annex XVII: REACH Restricted Substance List 2018](#)

The second is the Candidate List of substances, which is new. Suppliers of articles containing substances on the Candidate List in a concentration above 0.1% w/w (Weight by Weight) must provide sufficient information to their business customer upon supply to ensure safe use of the article including, as a minimum, the name of the substance. This information must also be supplied upon request to consumers, within 45 days of the request being received. We would encourage suppliers to remove and replace any SVHC with suitable alternative chemicals where this is feasible and advise us of this replacement or intended replacement. As the Candidate List is updated with new substances, which we expect to happen on a regular basis, these obligations apply to the newly listed chemicals from the date of inclusion.

The Candidate list can be found by following the link given here, [SVHC on Candidate List](#)

As required by the regulations, could you please complete the declaration and sign below as indicated, deleting which ever statement does not apply.

We _____ confirm that none of the products (and associated packaging) we manufacture and supply to the Nobia Group (see attached the full list of products supplied) contain SVHC as listed in the official candidate list published by ECHA.

We _____ further confirm that should the situation change and a substance from the candidate list now or in the future is used in the products (and its associated packaging) we supply, we will immediately inform the Nobia Group.

Please electronically return the signed declaration and all supporting documents in PDF format to:
