

## **DECLARATION ON CONTENT OF VOLATILE ORGANIC SUBSTANCES (VOCs) IN CURED FOAM PRODUCTS**

Our products made out of cured polyurethane foam have been subject to testing of the VOC content. As an exemplary material, our product "ZZ-Stein NE" (engl.: "ZZ-foam block NE") has been tested by Eurofins Product Testing A/S according to ISO 16000-3, -6, -9, -11 and ISO 16017-1 for classification according to the French regulation on VOC content.

The analysis not only showed compliance of our material for the best rating of the French VOC-label (A+) but also showed our material to contain no detectable amounts of VOCs at all.

For more detailed results please see page five of test report 392-2014-00305102A.

International ZZ-products made out of the same material:

<b>Name (German)</b>	<b>Name (English)</b>
ZZ-Stein NE	ZZ-foam block NE
ZZ-Stopfen NE	ZZ-foam plug NE
ZZ-Fugenband NE	ZZ-joint seal NE
